

# **Fit-To-Perform Training**

## **Best Prescribing and Drug Diversion**

This training is ideal for nurse supervisors, individuals in health and human resources, or any nurse who has an interest in the subject. It consists of strategies for identifying nurses with possible substance abuse/mental health issues as well as techniques to evaluate the performance of these individuals once they return to employment while under monitoring with WV Restore. Training includes in-depth details of the Restore program and its requirements for nursing professionals under monitoring, as well as potential employer's concerns/obligations when hiring these individuals. Legal issues are explained as well as explanations of the relationship Restore maintains with the WV Board of Examiners for Registered Professional Nurses. Any nurse who attends will receive 4 hours of continuing education credit for the fit to perform training and 3 hours credit for the required diversion CE (ANCC Certification pending).
